LOW ENERGY LIGHTING

There are low energy lightbulbs for practically all light fittings: spotlights, halogen uplighters, downlighters and dimmable, daylight and security lighting bulbs available. The following also include LED lighting mostly useful for halogen spot replacements (GU10).

There are many stores you can buy low energy lightbulbs but these are some of the ones we have found with a wide range and competitive prices.

[Nigelsecostore](#) £3.95 or free delivery over £50

[Bltdirect](#) £3.50 or free delivery over £35
